ABOUT US

Cubestech is a global professional services company that offers IT consulting, enterprise solutions, products, and services to all types and sizes of businesses across various industry verticals. We specialize in cloud services, mobility, DevOps, quality (engineering/assurance), and next-gen testing, infrastructure management services (IMS), and talent management solutions.

We cater to the industry-specific needs of business functioning of our global clients with comprehensive technology and consulting solutions through our facilities in the UK, EU, US, and Australia – all of which are complemented by an offshore development centre (ODC) in India.

Founded by highly experienced technology enthusiasts and veterans of the industry, Cubestech began its journey in the US about a decade ago, gradually expanding horizons to Europe starting with its UK operations in 2015, followed by the APAC region through its Australia and India offices.

We strictly follow an experts-led, consultative approach to fill the business-need-technology gap for our customers. Our persistent efforts towards achieving continuous improvement by stretching ourselves and making full use of our potential is our competitive edge. This approach has helped us succeed in better serving our clients by identifying their specific requirements, and addressing them most effectively and efficiently. We strive to constantly upgrade ourselves and fine-tune our methodologies to remain aligned with local as well as regional business environments.

All our offerings are backed by the firm knowledge of industry standards, regulations, and compliances amongst our ranks that comprise SMEs, technocrats, solution architects, engineers, designers, and quality specialists.

Vision

To deliver the most-fit solutions, services, and products for all the technology requirements of our customers,
- through a consultative and collaborative approach of work.
- by adopting established high standards of technology-enabled solutions that business operations warrant in the digital age.
- helping them achieve their strategic business objectives by providing unique, innovative, and well advised-in-class consulting that can enable them to make definitive, lasting, and substantial improvements.

Mission

To always facilitate our client's growth along with ours by being the trusted, reliable, and long-term technology partner that provides comprehensive solutions to the fullest satisfaction of our customers.

Our endeavour shall always be to deliver turn-key solutions that can create real business value for our

Why Cubestech?

Cubestech philosophy of doing business is pivoted around educating, inspiring, and serving all our clients who seek to enhance their technology experience. We always aspire to foster an open relationship with our clients by providing effective and efficient consulting experiences. Our uniquely structured questions, aimed at acquiring full knowledge and understanding of your company, make it easier to accomplish business goals through appropriate IT interventions. We believe this approach also improves our clients' ability to detect and manage risk complemented by cost-effective professional development opportunities.

Mission

Objectives:

- Offer consultation to understand the client's business objectives and goals.
- Inquiry to get a thorough understanding of everything they do by letting customers explain to us about how they work, the processes, its strengths, and the weaknesses.
- Fully analyze the requirements in conjunction with client stakeholders.
- Combine customer know-how and ours to propose and deliver the most suitable technology solutions that can help the customer achieve its business goals.
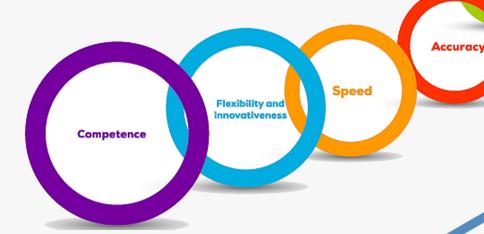

Be there with the client and its team to ensure a seamless and disruption-free transition to the new, optimized solutions that exactly fit business needs as it evolves.

Our core values

All our offerings are backed by the firm knowledge of industry standards, regulations, and compliances amongst our ranks that comprise SMEs, technocrats, solution architects, engineers, designers, and quality specialists.

Customer focus

Efficiency

Accuracy

Speed

Flexibility and innovativeness

Competence

• Integrity:
We embrace and uphold the highest standards of personal and professional ethics, honesty, and trust.

• Respect:
We treat everyone with uncompromising respect, civility, and fairness.

• Collaboration:
We work as a team and share knowledge for continuous improvement, learning, and innovation.

• Empowerment:
We are empowered to deliver operational excellence through innovation and leadership at all levels.

• Responsibility:
We are responsible to fulfil our commitments to colleagues and clients, with a clear understanding of the inherent urgency and accountability in those commitments.

Our Services

Technology solutions for your business transformation.

Cubestech's services help bridge the technology gap for modern businesses. Our consultative approach allows us to deep-dive into our client's business to be able to get an intricate understanding of how it operates and, accordingly, propose and deliver the most appropriate solutions.

Our expertise and versatile delivery experience help us to easily and fully understand the customer's specific technology requirements basis maturity, adoption, roadmap, and objectives and then propose the actual intervention.

Our services include:

- Cloud
- DevOps
- Mobile applications development
- Quality engineering, Quality assurance, and next-gen testing

Cloud Services

If your business anytime-anywhere agile?

No business that is digital, global, and diversified can afford to overlook the advantage that cloud can give its operations.

Be it data storage and access, applications hosting, or providing services, businesses have to be anytime, anywhere agile. Cubestech's cloud services equip your business with all the best benefits of cloud such as operational agility, scalability, higher computing power, built-in security, and business continuity.

DevOps Services

Continuum: Achieve best results from the coordinated efforts of your people.

Our DevOps services facilitate achieving best results out of the code-build-test process of continuous software solution/product development. Our engineers are well versed with the complete DevOps methodology from continuous integration/development, automatic configuration management, and security audits (networks, environments, applications) to load balancing, auto-scaling, disaster recovery (DR), as well as next-gen software/hardware monitoring.

Quality Engineering, Quality Assurance and NextGen Testing services

Let only your best offerings go to the market.

Cubestech offers comprehensive and specialized application/software testing services, besides facilitating cloud benefits maximization by testing in Agile or DevOps environments.

Our quality assurance offerings have helped clients achieve their strategic testing objectives and always contributed to bringing down the cost of software testing.

Enterprise Mobility

Power of 'mobile-first' to your business.

The ubiquity of mobile devices for people as the primary mode of getting done just about everything warrants that a 'mobile-first' should be the most significant strategy businesses should invest in.

Be it, retailers, manufacturers, dealers, stockists, service providers, small-medium scale industries, or large conglomerates – today, every type of business across industry verticals needs to possess the versatility of being available to their customers as well as their workforce via a mobile version.

Staffing Solutions

The costs of an agile and completely in-house IT team are impractical.

Cubestech offers staffing, recruitment, and talent management services to support the in-house technology initiatives of our clients, as well as the talent needs of some of the renowned clients, global solution providers, product companies, value added re-sellers (VAR), and technology start-ups.

Our talent pool helps bridge the gap between business IT needs and the required skills, to power our client's progression and growth. The high-calibre individuals in our ranks have contributed to the creation of many business-critical and impactful solutions that help our clients address business challenges.

The multi-technology IT expertise of our resource pool has extensive experience in

- Enterprise solutions delivery
- Application development
- Business intelligence
- IT infrastructure services
- Data Analytics
- PAAS/IAAS/SAAS
- Project Management
- Quality Assurance

We have placed over 700 consultants across the globe since our inception, which has bolstered our cross-industry project experience to over 1,400,000 man-hours.
